PROGRAMMABLE LIFT TABLE

10-2

Lift Table Shown Down, Lowered Position

SYSTEM FEATURES:

Programmable Lift Tables provide a flexible solution to obtaining variable work heights for loading, unloading, and handling of parts. Servo Driven Motion provides fast, accurate, and multi-positional motions that pneumatic operation can't provide. Corner linear bearing rails provide robust stability of the upper table. These systems are custom designed and built to suit your application of sizing and lifting capacity.

Lift Table Shown Up, Elevated Position

TYPICAL APPLICATION:

Outside of Press Stations to load and unload production parts. Mount a Conveyor on top and utilize to change Elevations like an Elevator, Lowerator.

Unit Shown: 60" X 60" Tabletop with 24" vertical stroke.

SYSTEM BENEFITS:

- Aids hazardous ergonomic considerations
- Allows increased production capacity
- Cuts part production labor cost
- Reduces costly manual labor
- Utilizes modern automation
