18-3

Waterfall, Curved Gravity Rail Track Shown

(2) Gravity Ride Rail Tracks to Load Strip Shuttle Unit Shown

TYPICAL APPLICATIONS:

Wide variety of applications.
Move parts from one process to another.
Remove parts from machining cells.

FEATURES:

Custom designed and built to suit your requirements as needed per application.

Can handle parts in contained part flow per application requirements.

Can be used to remove parts from machining processes and change the orientation for next.

Made from various materials such as work hardening sure alloy rail, and tool steels.

BENEFITS:

Allow increased production.
Can control part orientation.
Economical automation.
Eliminates hazardous manual handling.
Helps ergonomic considerations.
Reduces manual labor.
