

MANUFACTURED TWIST TRACKS

18-4

TYPICAL APPLICATION:

Wide variety of applications.

Utilized to change part orientation by simple gravity part containment orientation.

Transfer part from one process to another.

Remove parts from machining cells.

FEATURES:

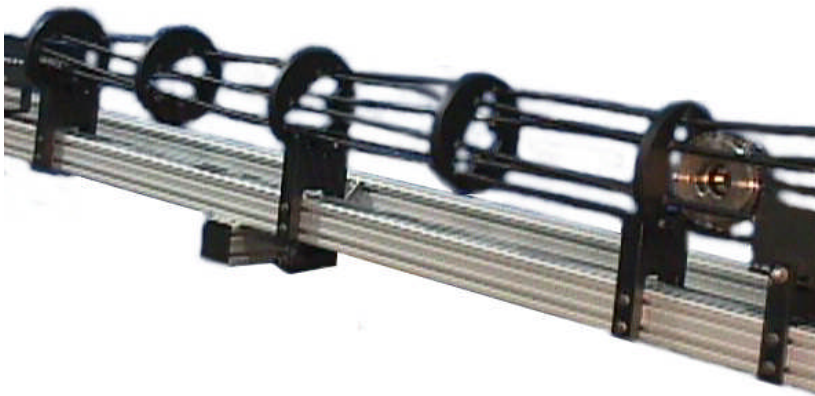

Custom design and construction to suit application requirements.

Open rail construction aids in debris removal.

Fixed or adjustable rails to handle dedicated parts or part family sizes.

Degree of twist to suit application.

Accommodates parts rolling or skidding on round or flat rails.

SYSTEM BENEFITS:

Aids hazardous ergonomic considerations

Allows increased production capacity

Cuts part production labor cost

Economical automation

Maintains part quality

Reduces costly manual labor

Storage provides continued through put operation
